

Magic Aura Shader

Description

Shader for HDRP/URP entirely made in the shader graph. Customizable unlit-based shader. This Shader allows you to change the color and intensity of the glow, also turn on flicker and adjust the frequency and rolloff. You can use and combine together your own alpha textures, adjust their transparency.

Performance

This asset was created on the following PC configuration (and were tested only on this configuration):

CPU: Intel Core i5-7600

GPU: NVidia GTX 1060 (6GB)

RAM: 16GB

OS: Windows 10 x64

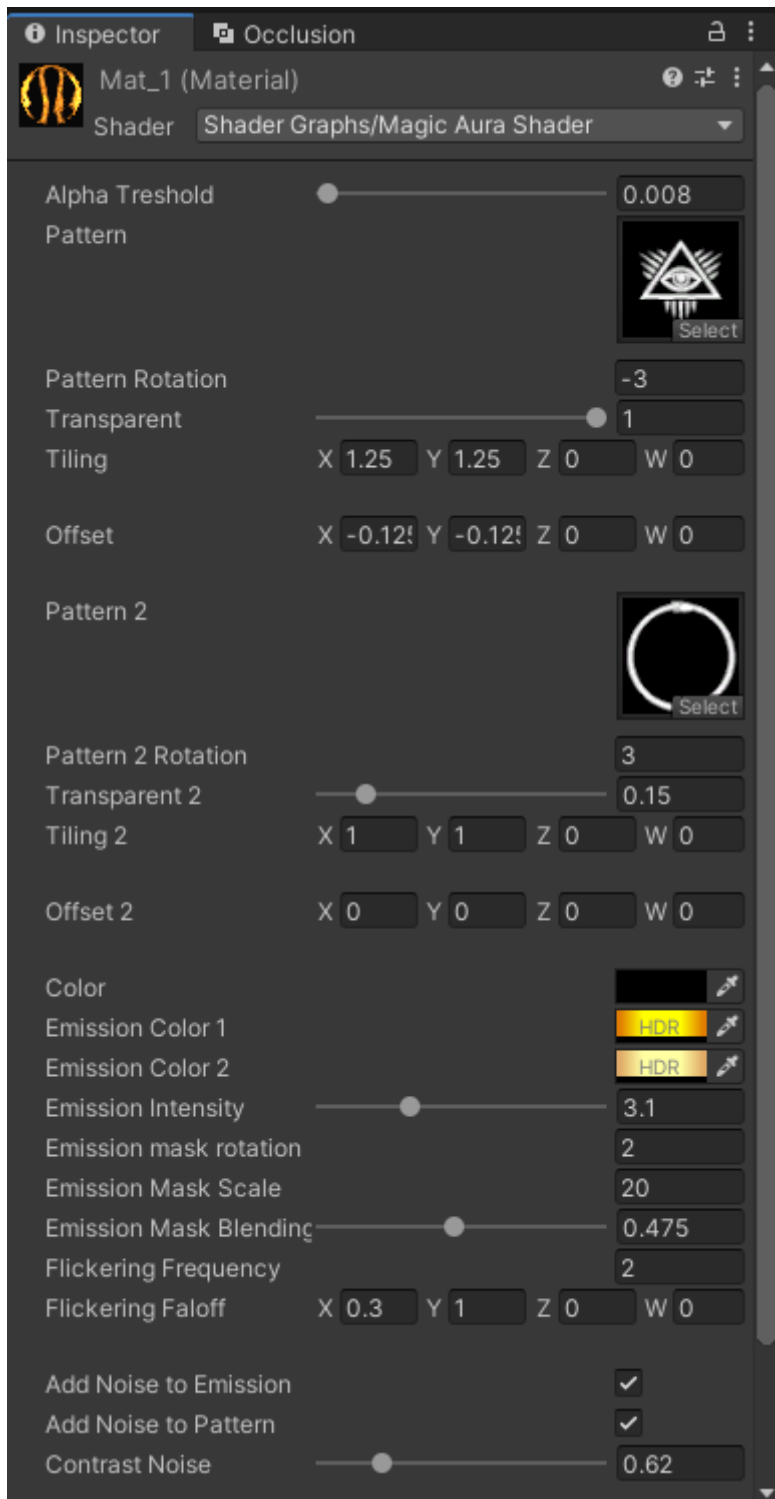

DirectX: 11

Rendering Pipeline

HDRP/URP

Customization

Emission Mask Blending – “0” – 100% color 1, “1” – max color 2 (by Noise mask)

Flickering Frequency - more – faster, 0 – static

Flickering Falloff - flicker brightness amplitude, X- min (from 0 to 1),
Y- max (from 0 to 1)

Add Noise to Pattern/Emissive – add procedural noise mask

Mask/Pattern Rotation - more – faster, 0 – static
